Tigar AD consolidates the financial statements of the companies it controls, partially consolidates the financial statements of Tigar Europe (at 50%), and includes a portion the profit due to Tigar AD from Tigar Tyres, proportional to Tigar AD's interest.

2.1.3. Market position**2.1.3.1.****Rubber footwear**

Tigar Obuća (Tigar Footwear) is a wholly-owned subsidiary of Tigar AD.

Its products include:

- § Safety footwear for civilian and military use, including products intended for the chemical industry, mining industry, forestry, petroleum industry, and fire fighting;
- § Women's fashion footwear and children's footwear;
- § Rubber footwear for hunting and fishing;
- § General-purpose rubber footwear; and
- § Rubber footwear for agricultural uses.

A new footwear factory was put into operation in September 2008 at the new, Tigar 3 location. Its capacity is 4 million pairs. The overall investment was 17.6 million, of which 7 million was invested in equipment. This factory is the European leader in its market segment in terms of capacity and production facilities.

In August 2008, Tigar Footwear acquired the Century Division of the UK company Hunter Boot Limited, which specializes in safety footwear. Under this transaction, Tigar Footwear became the owner of three internationally-recognized safety footwear brands: Century, Forester, and Firefighter. It also acquired the leading-edge dipping technology.

Tigar Footwear intends to focus on the development of its proprietary brands.

Based on outsourced reports, the European market potential is 240 pairs of rubber footwear and major footwear competitors in this market are: Chinese manufacturers (50%), Vulkan Slovakia (11%), Fagum-Stomil Poland (4%), Novesta from the Czech Republic (4%), Finka Romania (2%), and others (21%). Tigar Footwear held an 8% market share in previous years. For the most part, exports include safety boots certified by international certification bodies. These boots are manufactured from specialized materials which can withstand high temperatures and extreme conditions. Agricultural and general-purpose footwear export levels are relatively low.

Tigar Footwear sells 25% of its total output to the domestic market, generally agricultural and general-purpose footwear. Domestic competition includes imports from China, Italy, Romania, and Turkey, as well as several local manufacturers whose offering and quality are well below those available from Tigar Footwear. According to the National Statistical Office, Tigar Footwear holds an average rubber footwear market share in Serbia of 75%.

Technical rubber goods and sporting goods

Tigar Tehnička guma (Tigar Technical Rubber Goods, TTRG) is a wholly-owned subsidiary of Tigar AD.

It manufactures:

- Rubber/metal products;
- Molded rubber products for the construction industry;
- Various rubber products for the automotive industry;
- Tire-retreading material;
- Rubber balls and various other types of sporting goods;
- Diverse types of products made from recycled rubber; and
- Fuel tanks for fighter aircraft and rubber parts for tanks.

According to the National Statistical Office, TTRG's share of the Serbian market is the following: molded rubber items for the construction industry (40%), rubber tubing (30%), tire-retreading material (40%), and sporting goods (15%).

TTRG's major competitor in the molded-items market segment is Vulkan from Niš. It has no domestic competition in the sporting goods segment; its competition mainly comes from imports.

TTRG does not have a significant presence in the global market. For the time being, production of finished goods made from recycled rubber, which was launched in 2006, targets the domestic market. The most popular product in this range is flooring for sports courts and athletic tracks. TTRG is currently negotiating the acquisition of a European manufacturer of recycled-rubber products. The intent is to move this production to Serbia. TTRG is expected to become the owner of several groups of products certified per EU standards.

The old TTRG factory was shut down in December 2008 and its new factory will be put into operation at the Tigar 3 location in October 2009. Plans call for a plant for the manufacture of products made from recycled rubber to be commissioned at the same location in December 2009. Thereafter, TTRG expect to boost exports of this group of products.

Chemical products

Tigar Hemijski proizvodi (Tigar Chemical Products, TCP) is a wholly-owned subsidiary of Tigar AD.

TCP produces:

- Special conveyor belt adhesives;
- Various types of adhesives for furniture, footwear and other industries;
- Road paint;
- Special dyes for the food industry;
- Paint for the construction industry;
- Anti-corrosion coatings;
- Special self-spreading polyurethane flooring for industrial plants, sports courts and large enclosures; and
- Diverse products for the consumer market.

TCP's products generally target the domestic market. Major domestic competitors include: Duga from Belgrade, Zvezda Helios from Gornji Milanovac, Zorka Boje from Šabac, Prvi Maj from Čačak, and Grmeč from Belgrade.

According to the National Statistical Office, TCP has the following market share: 40% for conveyor belt adhesives in mining operations and roughly 50% of the road paint segment.

TCP's major export markets are South Africa (adhesives for conveyor belts) and Greece (road paint).

2.1.4. Operations away from corporate seat

2.1.4.1. Locations, other than the issuer's corporate seat, where the issuer conducts business (organizational/business units and branch offices):

Sales in Serbia

Tigar Trade is Tigar's domestic sales network and a wholly-owned subsidiary of Tigar AD.

Tigar's domestic sales network is comprised of:

- **AUTOMOTIVE SERVICE NETWORK „STOP & DRIVE“**, which offers a wide range of tires and automotive accessories following a multi-brand/multi-product strategy, as well all automotive services such as light vehicle servicing, tire replacement, tire balancing, wheel alignment, tire repair, oil change, and car wash. In August 2009 this network began to conduct mandatory vehicle inspections. It also operates a number of mobile units which offer on-the-spot tire removal, installation and balancing services. Stop & Drive is comprised of 22 service centers (3 for trucks and the remainder for cars and light utility vehicles) and 4 mobile units (3 for trucks and 1 for cars).
- **RETAIL NETWORK**, comprised of 27 retail outlets which offer rubber footwear, technical rubber goods and chemical products made by Tigar. Some of these outlets also sell tires and automotive afterparts and car care products.

- **BOTTEGA FOOTWEAR CHAIN**, currently comprised of three outlets (in Belgrade, Novi Sad and Pirot), which offer men's, women's and children's leather footwear throughout the year. During the October-March period, this chain will also offer Tigar Footwear's new stylish collections. Plans call for the opening of another 15 stores of this type over the next three years.
- **3 REGIONAL BRANCH OFFICES**, in Belgrade, Novi Sad and Niš
- **3 WAREHOUSES**, in Pirot, Belgrade and Novi Sad
- **COMPANY'S HEADQUARTERS IN PIROT**

Tigar Trade conducts purchasing, sales and logistical activities in the domestic and international markets for Tigar Footwear and Tigar Technical Rubber Goods. Additionally, the Automotive Service Network sells tires, automotive afterparts and car care products, and provides automotive services.

Sales to international markets

Tigar Europe, United Kingdom

Tigar has been very active in the UK market for more than 15 years via Tigar Europe, in which it holds a 50% interest. Tigar Europe has an excellent knowledge of the UK market and a well-established client base, and it provides superior services. Tigar Europe, a wholesale company, also has the know-how, capability and business connections to act as a supplier of equipment, materials, spare parts, and other goods to Tigar and its subsidiaries. In addition to tire and footwear sales to the UK market, Tigar Europe will in the future intensify purchasing activities and support a number of corporate projects.

Tigar Americas, North America

Tigar Americas covers US and Canadian markets. Tigar Americas was the first commercial company which Tigar set up abroad and, prior to the trade embargo, had annual revenues of \$20 million. Following the lifting of the trade embargo, Tigar decided to renew its business operations in North America and to focus on sales of rubber footwear. Its plans also call for a significant increase in purchasing of equipment, materials and spare parts from the US dollar market for Tigar Trade and the manufacturing subsidiaries controlled by Tigar.

The Balkans

Tigar AD's subsidiaries in the Balkans are co-owned by Tigar AD and its local partners, with Tigar AD holding the controlling interest in each of these companies. Prior to the 1990's, these companies were Tigar's branch offices in the various republics of the former Yugoslavia and, consequently, Tigar's tradition in these markets is well established.

Market research

A representative office in Sofia, Bulgaria, is currently conducting market research and assessing the potential of the Bulgarian market as well as the markets of other countries in the region.

2.1.5.2.

FRAMEWORK AGREEMENT, PUT/CALL OPTION AGREEMENT, AND REAL ESTATE CONTRACTS AMONG TIGAR AD AND MICHELIN FINANCE**Changes in Tigar Tyres equity structure**

Following the exercise of Michelin's call option in April of 2007, Tigar AD held a 30% stake in Tigar Tyres. On 27 February 2008, Tigar AD's General Assembly of Shareholders passed a resolution concerning the disposal of major assets, including the sale of Tigar AD's 30% stake in Tigar Tyres (in three equal installments in 2008, 2009, and 2010) and the sale of land at the Tigar 2 location.

The transaction with Michelin includes the sale of:

Tigar AD's 30% stake in Tigar Tyres, to be disposed of through three put options from July 2009 to February 2010, as follows:

- 6,013,969 € - July 2008
- 6,201,905 € - February 2009
- 6,395,715 € - February 2010

The first two installments were paid by their due dates. Based on the formal agreement, the third installment will be paid not later than 16 March 2010.

Changes in Tigar AD's accounting policy

In 2003, 2004 and 2006, based on its majority interest in Tigar Tyres, Tigar AD applied the *pro rata temporis* method and fully consolidated the financial statements of Tigar Tyres.

During the period from 1 January to 31 December 2006, with its 49.4% interest in Tigar Tyres, Tigar AD was the majority shareholder but not the controlling shareholder. As such, the proportional method of consolidation was applied based on the percent interest. The financial statements of Tigar Tyres were not consolidated in 2007 and 2008.

2.1.6. Discontinuities of business operations**2.1.6.1. Any discontinuities of the issuer's business operations during the past three years, and reasons for such discontinuities:**

There were no discontinuities of operations.

MANAGEMENT	<p>BOARD OF DIRECTORS Miodrag Tančić, Chairman Jelena Petković, Member Ivan Mijalković, Member Slobodan Sotirov, Member Miodrag Dopuđa, Employee Representative</p> <p>EXECUTIVE OFFICER Dragan Đorđević</p>
DEVELOPMENT POLICY AND STRATEGY	<p>Development strategy includes both production growth and changes in the product mix through a re-orientation toward sophisticated products, primarily in the areas of safety, sports, and general-purpose rubber footwear. It also focuses on the introduction and manufacturing of products made under globally-recognized brand names, with parallel development of Tigar-brand products for the domestic and international markets.</p> <p>In the international market, the focus is on off-take manufacture of globally-recognized brands and sales to large distribution chains and independent dealers, to whom Tigar-brand and private-brand products introduced in the meantime will be offered. In addition to Europe, Tigar Footwear intends to further expand its sales to the US and Canadian markets.</p> <p>Plans call for a significant growth in sales to the domestic market, not only of products for agricultural and general-purpose uses, but of safety, fashion, and children's footwear as well. Domestic market sales will focus on end users which, in addition to natural persons, include fleet buyers, primarily large industrial complexes.</p> <p>In 2008, Tigar Footwear moved to the new, Tigar 3 industrial location, where a full upgrade of manufacturing processes was implemented with the goal of a significant increase in productivity and reduction in production costs, primarily through reductions in scraps and waste, and employee expenses. Lower costs should allow for a full valorization of the introduction of new, more sophisticated products manufactured for international markets in 2006 and 2007.</p>

	<p>Exports target the following markets:</p> <ul style="list-style-type: none"> - Europe, particularly the UK and Scandinavian countries; - Canada and the US; and - The Balkans. <p>Elimination of negative seasonal impact through higher output of safety footwear and the introduction of new groups of products, such as:</p> <ul style="list-style-type: none"> - Rubber/fabric; - Rubber/PVC; and - Rubber/leather, <p>should significantly improve the bottom line.</p> <p>The investment program was financed by Tigar AD, in the form of a Tigar Footwear capital increase, and from a long-term capital loan granted by DEG.</p>

2.2.3. Patents, concessions, special permits

- 2.2.3.1. Brief description of the conditions and expected durations of granted concessions, patents, major commercial contracts, franchise agreements, special import/export permits and/or business activity permits, and the like:

2.2.4. Major capital investments

- 2.2.4.1. Description of major investments and withdrawals of funds invested in above assets during the past three years, and description of the financing method for each investment; description of other significant investments and withdrawals of investment funds, and of respective financing methods:

Tigar's largest investment was made in its new industrial compound – Tigar 3, which was purchased in 2006. The surface area of this location is 138,362m² and it holds two industrial buildings of 18,452m². Following the purchase, Tigar implemented an extensive construction, reconstruction and refurbishment project. Current occupants of the location are: a central power station, the footwear factory, the technical rubber goods factory (under construction), the recycled-rubber products plant (under construction), construction unit plants, and transportation unit facilities. Plans call for the construction of a central warehouse for Tigar Footwear and Tigar Technical Rubber Goods, a rubber compound mixing plant, and a factory for Tigar Chemical Products (unless studies and project documents suggest that this factory should be built at one of the other Tigar locations).

The second largest investment was made in the restructuring and expansion of Tigar's sales network. Plans call for the number of its automotive service centers to be increased from the current 22 to 30 by the end of 2010. The Bottega Chain, which is currently comprised of three specialty stores, will operate 15 in three years. The number of standard retail outlets will remain the same.

A large number of service businesses, especially those whose activities are not directly related to Tigar's industrial and commercial businesses (considered to be its core businesses), render corporate operations widely diversified. On the one hand, this diversification disperses the risk and has a positive effect on overall business operations. However, on the other hand, it has an adverse impact on coordination efficiency in view of a high level of internal sales which opens the issue of transfer pricing. The current business plan calls for consolidation of these companies through separations and mergers, aimed at creating companies which conduct one or more related activities and are more powerful in business and financial terms. Special studies by line of business will be prepared to ensure that changes are based on solid arguments and financial projections.

The separation of the construction unit of Tigar Business Services and its merging with Tigar Incon, whose main activities include design, engineering and supervision, has created a substantially stronger subsidiary which is able to offer both design and contractor services. As in 2008, Tigar Incon will focus on services for the Tigar Corporation in 2009. However, as of 2010, it will start seeking non-Tigar customers and become involved in imminent Corridor X and gas pipeline projects. Its ability to procure major contracts depends on the machinery at its disposal and a special development study will be prepared to show whether Tigar Incon should become a strong construction contractor or retain its current level of business. Tigar Incon's present business plan is based on its available resources.

Pirot Free Zone's business plan is based on its current capability, including available infrastructure. A special study will have to address the development potential and propose a development concept, which will have to be approved by Tigar's partner in this company.

Business plans for Tigar's other service subsidiaries are based on their current performance and projected growth using available resources. In view of all the activities that have to be completed and the projects that have to be prepared in 2009, the restructuring of Tigar's other subsidiaries has been deferred until the 2010-2012 period.

04 June 2008

12 June 2007

- The General Assembly of Shareholders approved the distribution of 2008 interim dividends based on 1st quarter statements. The net dividend per share amounted to 29.42 RSD. These interim dividends were distributed at the same time as the 2007 dividends.

2.3.7. Off-balance sheet items

2.3.7.1. Description of significant off-balance sheet items:

2.4. OTHER SIGNIFICANT FACTS

2.4.1. Other significant facts which might be relevant to decision making by investors with regard to the issuer's business, activities, and financial position:

3. ISSUER'S DEVELOPMENT POLICY

3.1. PLANNED DEVELOPMENT ACTIVITIES

3.1.1. *Planned capital increase*

3.1.1.1. Describe capital increase plans and methods, and the projected timeline:

A 2006 resolution of the General Assembly of Shareholders allows for the issue of 25% of new shares to meet investment needs.

There are no plans for a capital increase in 2009.

3.1.2. *Planned expansion of business activities*

3.1.2.1. Introduction of new lines of business and increase in scope of current lines of business:

In this regard, plans call for the following:

- Constant monitoring domestic and international market demands, and analyses of development trends;
- Introduction of highly sophisticated products across all segments to avoid direct competition with mass producers, particularly from the Far East;
- Development of alliances with well-known manufacturers and production for their needs under their brand names;
- Development of Tigar-brand products across all segments;
- Intensive development of recycled-rubber products;
- Implementation of a scrap tire recycling project; and
- Development of a network of end users within Serbia and the Balkans through the development of the domestic sales network.

3.1.3. *Planned investments*

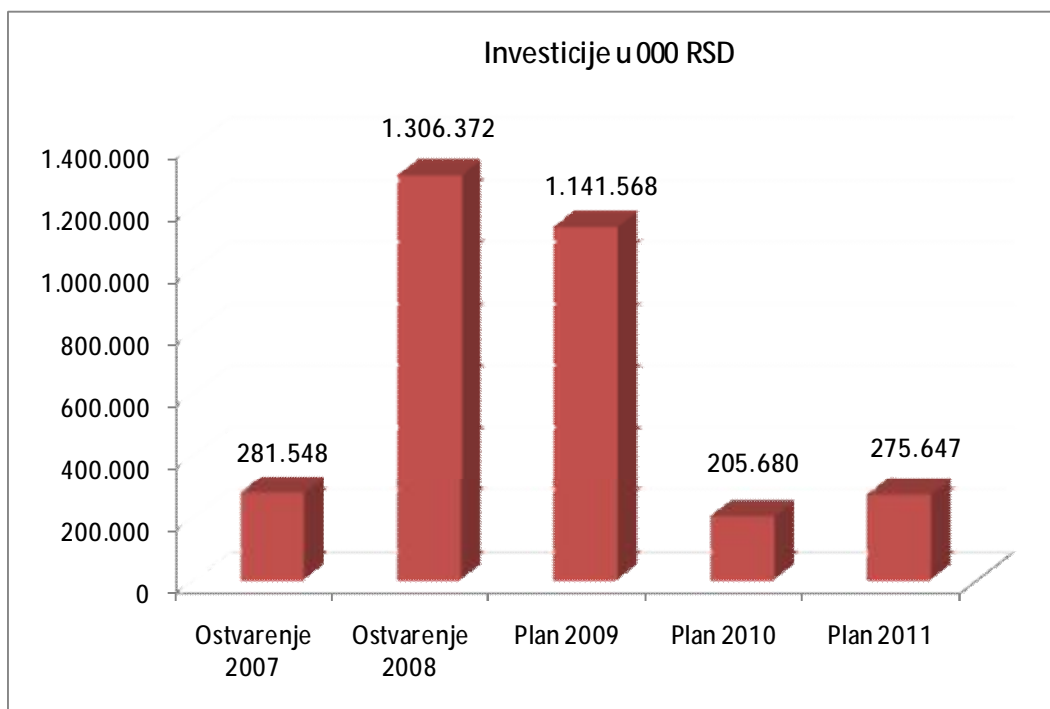

3.1.3.1. Planned capital investments and expected proceeds from investment in real property and other legal entities; projected funds required for such investments; and financing methods:

Overall expectations are a growth in volume, alignment with market requirements, and an increase in business performance and net profits, as outlined in the adopted Business Plan.

Plans through the year 2010 call for investments in the following:

- Elimination of production bottlenecks, upgrading of production processes, and re-engineering across all segments;
- Reduction in production costs through reductions in consumption of raw materials and number of employees required for specific processes;
- Higher energy efficiency across all segments through energy saving processes;
- Introduction of new, sophisticated products to avoid direct competition with mass producers, particularly from the Far East;
- Brand promotion;
- Maintenance and enhancement of the integrated quality and environmental management system, and introduction of an employee safety and health management system;
- Employee education and training;
- Development of the domestic and international commercial network; and
- Corporate management refinements.

Total investments are shown in the following figure:

3.1.4. Business trends

3.1.4.1. Issuer's business development expectations; price trends of services rendered and/or goods sold:

The rubber industry is extremely competitive and competition is expected to grow in the coming years. The basic response is to move to higher segments where highly complex and sophisticated products are offered.

Raw material and energy price fluctuations also have a significant impact on rubber industry performance.

With regard to raw materials, prices of natural rubber and crude oil have the greatest impact, since they constitute basic inputs, and they affect all manufacturers equally.

With regard to products, individual groups of products are not expected to grow but average prices will be improved through a more attractive product mix and introduction of new products whose level of sophistication is higher.

3.1.5. Position in the relevant sector

In the tire segment, Tigar Tyres is expected to assume a leading role in the third segment of European manufacturers.

In the footwear segment, the implementation of the upgrading program is expected to increase its European market share to 15%. Tigar Footwear's factory is the largest and most sophisticated European factory of its kind.

The upgraded technical rubber goods segment, including recycling, is also expected to enter the group of leading European manufacturers.

The implementation of the sales network development program is expected to result in a leading position among tire and car part dealers in the Serbian market, as well as in the footwear market segment.

Development of other activities is expected to rank them among respective market leaders in Serbia.

3.1.5.1. Issuer's assessment with regard to its position within the sector in which it operates:

Ongoing successful development is dependent on the following conditions:

- Political stabilization;
- Changes in legislation, particularly relating to corporate law, taxation and protection from unfair competition;
- Creation of a favorable environment for foreign investors, in order to stabilize market conditions and neutralize non-economic influences on corporate performance;
- Jumpstarting of domestic industries and increase in the purchasing power of the domestic market; and
- Favorable loan terms supportable by performing businesses.
